REPORT OF SCHOOL ADMINISTRATION

To the Citizens of Deering:

I herewith submit my sixth annual report concerning school problems in Deering.

To evaluate any contest or operation, we first have to know the rules of the game or the objectives of the program. The objectives of any good educational program are determined by the educational needs of the community which the program is to serve. Such objectives have little value however, unless they are thoroughly understood by the community. Any community which operates a school just because it always had one, is wasting its money except that some good may accidentally come from such expenditures.

The costs of educational programs are now so high in comparison to those of fifteen years ago, as are all other costs of living, that alarm causes us all to re-examine the program with critical eyes. To decide whether our results are worth the price or not, we should first determine what it is that we want.

Someone has pointed out that it is the privilege of the school to nurture the young to know and understand the world aright and, maybe, as they grow to maturity to redeem it.

In our world today we are being threatened by a Russian power which is bent on controlling all peoples. The American way of life is called democratic because it operates under a government closely supervised by the people themselves. If the United States is to continue to be a democracy, its citizens must be free. If citizens are to be free, they must be their own judges and if they are to judge well, they must be wise about problems of their society. While our citizens are presently born as free citizens, they are not born wise. Therefore the job of liberal education in our democracy is to make our free men wise. If our democracy requires that the people shall judge, liberal education

must help people to judge well. There are today many highly regarded citizens who never having examined the problems of living in a democracy and of protecting it against a mental attack such as that of Russia; in desperation try to foist dogma on our programs instead of giving us sufficient funds and facilities to strengthen the democratic experiences and learnings of the future citizens now in our schools. James Madison long ago pointed out in his contributions to the *Federalist Papers* that mere election of public officials would never guarantee the proper perpetuation of our democracy. Schools can do the job if they are organized and administered in the proper manner.

Proponents of liberal education will be threatened by believers in dogma. The true liberal acts slowly; for the processes in which he has faith take much time. He must assay others' beliefs so that what he eventually does or says will be less narrowly conceived. It is much easier for the American with little understanding of democracy to act, for he just knows that he is right and because he is right he deserves power. If this type of authority builds up in a community, it results in those in power calling everything right if they agree or all wrong, if they don't. We all know that this is the way to destroy truth and democracy.

The schools then must stand for liberal education if we are to preserve our democracy. There is every likelihood that they will have to put up violent struggles against authoritarian forces who may even operate in a democracy.

Your pupils are being given good training in the fundamental processes of education such as reading and arithmetic. With these tools to work with, they may study the world in which they live. Many of their teachers then give them opportunity to experience the processes of a democracy in operation.

Deering continues to send most of its pupils to Hillsboro. This would appear to be a good arrange-

ment for the pupils and for Deering. It is also helpful to Hillsboro, financially. The tuition rates have been raised again for next year. They will still be less than the state average cost of instruction for the current year. The cost is probably lower than Deering could operate even a minimum program for and certainly less than you could operate a suitable program.

The Deering budget is probably just enough to operate with next year. School costs have gone up just like everything else but while we're on the subject of money, so have wages, dividends and most other income. The transportation contract with Whitney Bus Service has just been extended for three years, until June 1954, at the same annual cost as heretofore. Transportation represents quite a part of the school cost and the close cooperation of your school board and the transporter in this contract extension is commendable since in view of rising costs everywhere, it represents further savings to the district and still provides the already proved transportation facilities. The new program of the State Highway department in helping to build local highways is in line with our previous pleas for highway planning in towns such as Deering where highways play such an important part in the school operation.

The East Deering school continues to serve the pupils in that area very well. The improvements have made it a much happier place to learn in. Mrs. Ruth Fisher has fitted into its life very adaptively as our new teacher. Her pupils are showing excellent progress, particularly in reading. Kenneth E. Jewett, Fine Arts Supervisor in the area, has worked with Mrs. Fisher twice a month at the school to promote learnings in Art and Music. His work with pupils is always inspiring and the pupils always await his return visit with eagerness. Mrs. Griffin has continued her health program at the school with attendant benefits to the

pupils' welfare due to her constant interest in their problems.

In conclusion I extend my sincere thanks for your generous financial and moral support of our educational program. It has been a great pleasure to cooperate with Mr. Fales, Mrs. Herrick and Mrs. Willgeroth of your School Board in the administration of your educational services.

Respectfully submitted,
STEWART V. McCORMACK,
Superintendent of Schools.
